

Global Biopesticides: An Overview of Natural Pesticides

Base Year: 2021

**Published:
November 2022**

4th edition

This report provides a window into the growing biopesticides market. It includes technology descriptions, company profiles, and end-use analysis of product pest targets, while providing an outlook and product category forecast for each country/market segment and company.

Regional Coverage:

- Argentina • China • India • Mexico • Spain
- Brazil • France • Italy • Morocco • United Kingdom
- Chile • Germany • Japan • South Africa • United States

SCOPE

- › The biopesticides market situation for each country
- › Sales segmented for each country by crop or application
- › Information on key diseases and pests treated with biopesticides
- › Sales of biological insecticides, nematicides, fungicides, herbicides, and seed treatment products

Technologies included:

- › Microbial species, such as beneficial fungi, viruses, or bacteria, acting as pesticides; examples include Bacillus, Beauveria, and Spinosad
- › Natural materials with pesticidal properties, such as diatomaceous earth
- › Plant extracts, such as neem, pyrethrum, and others, as appropriate
- › Biological seed treatment, including a cross-section of technologies used as protectants and stimulants. Examples include Bacillus, harpin, pseudomonas, and Trichoderma
- › Pheromones

TABLE OF CONTENTS

Introduction

Executive Summary

An overview of the report findings plus a forecast

Individual Reports

For each country, the following market segments are covered (where appropriate):

- Field Crops
- Orchard
- Vegetables
- Specialty
- Non-Crop
- Consumer OTC (US only)
- Biological Seed Treatment

End-Use Analysis

Each country/market segment contains the following information (where appropriate):

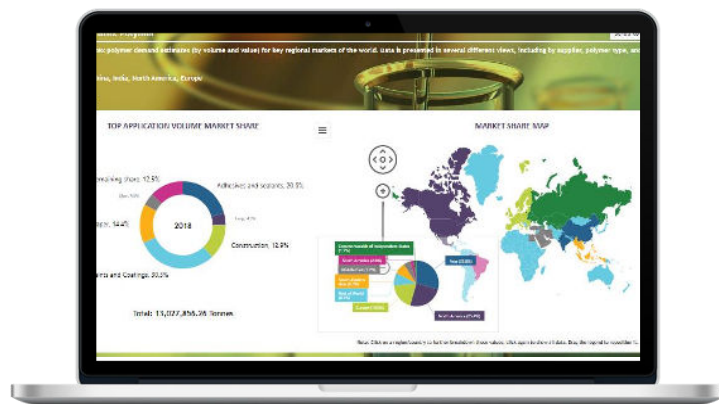

- Country Background
- Biological Pesticides Overview
- Types of Biological Control

For each application:

- Pest and Diseases Treated
- Sales by Brand
- Sales by Active Ingredient
- Sales by Supplier
- Outlook for Biopesticide Sales by Segment for the Next Five Years

INTERACTIVE DATABASE

Includes an interactive database that will allow subscribers to customize data to fit their needs

REPORT BENEFITS

This report serves as an excellent resource for any organization interested in the emergence of the biopesticide market, its technologies, products and key companies. Specifically, it will assist subscribers by providing:

A highly reliable and independent assessment of current brand sales, emerging technologies, and company positions

Forecast outlook for the next five years for each crop segment and insights into new technologies and expected market developments

An interactive database that will allow manufacturers and marketers to customize data to fit their needs

METHODOLOGY

Kline's approach places principal emphasis on primary research techniques to ensure that the foundation of business intelligence and insight is accurate, current, and reliable. Building on our 60-plus years in the business and leveraging our worldwide network of offices, our teams of seasoned professionals draw upon pragmatic industrial and commercial experience to understand and interpret global impacts and local perspectives. Our industry expertise is elevated by technology and systematic data collection processes to deliver more predictive and actionable data and insights.
