

# Global Biopesticides

## Natural Pesticides In Emerging Markets

This report provides an analysis of the growing biopesticides market. It includes technology descriptions, competitive landscape, and end-use analysis of product pest targets, while providing an outlook and product category forecast for each country/market segment and company.

### Scope

- Biopesticides market situation for each country
- Sales segmented for each country by crop or application
- Information on key diseases and pests treated with biopesticides
- Sales of biological insecticides, nematocides, fungicides, herbicides, and seed treatment products

### Ingredients included

- Microbial species, such as beneficial fungi, viruses, and bacteria, acting as pesticides; examples include Bacillus, Beauveria, and Trichoderma
- Natural materials with pesticidal properties, such as diatomaceous earth
- Plant extracts, including neem, pyrethrum, and others, as appropriate
- Minerals including copper and sulfur
- Biochemicals including Spinosad, abamectin, and pheromones

### Regional Coverage

### Features + Timing

Base year

2024

5th<sup>Edition</sup>

Published

Q4 2024

### Kline + Company Offers

A highly reliable and independent assessment of current brand sales, emerging technologies, and company positions

Forecast outlook for the next five years for each crop segment, and insights into new technologies and expected market developments

An interactive database that will allow manufacturers and marketers to customize data to fit their needs

### Enhanced Forecasts

Predicts future market metrics using advanced data science techniques with industry expertise

Identifies factors driving growth through analysis of macroeconomic, climate, and crop trend indicators

Provides up-to-date data for informed decision-making based on our automated processes and refined predictions

### About Kline + Company

Kline + Company is a global market intelligence and advisory firm with core competencies in the Chemicals and Agrochemicals sectors. Celebrating 65 years of service in 2024, Kline empowers clients to make informed decisions that drive business growth with an unparalleled depth of industry expertise, extensive research capabilities, and data-driven insights.

Primary research techniques

Worldwide network of offices

65 years of industry expertise

## TABLE OF CONTENTS

### Introduction

### Executive Summary

An overview of the report findings plus a forecast

### Individual Reports

For each country, the following market segments are covered (where appropriate):

- Field Crops
- Orchard
- Vegetables
- Specialty
- Non-Crop
- Biological Seed Treatment

### End-Use Analysis

Each country/market segment contains the following information (where appropriate):

- Country Background
- Biological Pesticides Overview
- Regulatory Overview

For each application:

- Pest and Diseases Treated
- Sales by Brand
- Sales by Active Ingredient
- Sales by Supplier
- Outlook for Biopesticide Sales by Segment for the Next Five Years

**Includes interactive database that allows subscribers to customize data to fit their needs**
