INTERACTIVE DATABASE

DATABASE BENEFITS

This easy-to-use database, accessible online, assists grease/lubricant marketers in identifying opportunities and assessing challenges within the industry. It also serves as an invaluable tool in the strategic planning process.

A highly reliable and independent up-to-date assessment of grease production plant capacity by country, including annual updates on plant closures, upgrades, and ownership

Grease manufacturers profiles, which help with entry strategies to identify key competitors, including global majors, national oil companies, and regional, independent suppliers, and toll manufactures

Intelligence on grease producers' capability in terms of product specialization based on grease soap or thickener type

Methodology

Kline's approach places principal emphasis on primary research techniques to ensure that the foundation of business intelligence and insight is accurate, current, and reliable. Building on our 60-plus years in the business and leveraging our worldwide network of offices, our teams of seasoned professionals draw upon pragmatic industrial and commercial experience to understand and interpret global impacts and local perspectives. Our industry expertise is elevated by technology and systematic data collection processes to deliver more predictive and actionable data and insights.

New and Improved Forecasts

Kline's new enhanced forecasting capabilities combines the power of advanced data science techniques and industry expertise to predict future market metrics. We analyze economic, demographic, social media, and consumer trend indicators to identify the factors driving growth. Our algorithms refine predications, and our automated processes provide the latest data for informed decision-making.
