

Industrial Esters: Market Analysis and Opportunities

Base Year: 2022

**To be Published:
Q4 2023**

1st edition

With a sizeable global demand, esters are a family of chemicals being used in a variety of end-use applications. While personal care has long been one of the fastest-growing applications, esters suppliers can supply to many various applications. This is a definite advantage when it comes to diversification, but it also requires a fine understanding of each applications to make the most of market opportunities.

Regional Coverage:

- China
- India
- United States
- Europe
- Southeast Asia

SCOPE

A comprehensive analysis examining the esters market for various industrial applications, this study would provide a detailed assessment of the market size, competitive landscape, trends, and growth opportunities in key application markets.

Esters covered within eight ester groups, as shown in table 1

- › Consumption of esters by application and region
- › Supplier sales by esters type, application, and region
- › Average market pricing of esters by region
- › Forecast consumption of esters within a five-year time frame
- › Analysis of growth drivers and restraints for each application in each region

CONTENTS

This series consists of a **report per country/region** and a **fully interactive database**. While the dataset allows users to customize views according to supplier, excipient category, and excipient, the reports provide subscribers with informative explanations on database figures, forecasts models, and market drivers.

Database

The database provides information on the level of ester groups and allows users to fully customize their view. Data available includes the following:

- Consumption by end use and region
- Supplier shares by application and chemistry
- Market pricing
- Forecast by 2027

TABLE 1. ESTER GROUPS COVERED

Carboxylic acid esters
Citric acid esters
Fatty acid esters
Nitric acid esters
Phosphoric acid esters
Polyol esters
Sulfuric acid esters
Other esters such as carbonic acid esters, acrylic esters, etc.

Reports

The reports are designed to qualitatively explain market dynamics shown in the database. Each report includes one chapter per industrial application. Each chapter will provide information on:

- Application and regulatory overview
- Market sizing
- Competitive landscape analysis
- Appraisal and outlook

TABLE 2. APPLICATIONS

Adhesives and sealants
Crop protection
Construction
Food and beverages
HI&I
Lubricants
Metalworking fluids
Oilfield and mining
Paints & coatings
Paper
Personal care
Textiles
Other (pharmaceuticals, emulsion polymers, solvents, plastics, etc.)

REPORT BENEFITS

Through this global program, subscribers will be better positioned to exploit identified business opportunities for esters used across various industrial applications. Specifically, this program would assist subscribers by providing:

A highly reliable and independent assessment of usage of esters in various industrial sectors

An appraisal of market trends, supplier landscape, and demand drivers, plus forecast

Identification of key growth potential areas by product type and application

METHODOLOGY

Kline's approach places principal emphasis on primary research techniques to ensure that the foundation of business intelligence and insight is accurate, current, and reliable. Building on our 60-plus years in the business and leveraging our worldwide network of offices, our teams of seasoned professionals draw upon pragmatic industrial and commercial experience to understand and interpret global impacts and local perspectives. Our industry expertise is elevated by technology and systematic data collection processes to deliver more predictive and actionable data and insights.

Management Consulting

KLING CREDENTIALS

Kline is a leading global management consulting and market research firm offering the complete spectrum of services. The firm has served the management consulting and market research needs of organizations in the chemicals, materials, energy, life sciences, and consumer products industries for over 60 years.
