About Kline

Kline, a management consulting and market research firm, elevates industry expertise with technology to deliver highly predictive and actionable data, insights, and specialist advice.

We are known as “The Industry Experts,” with an enviable reputation for delivering best-in-class data and advisory services for several very targeted industry segments. This is why clients choose Kline and how we are different from other management consulting and market research firms.

We purposely set out to own three specific sectors — lubricants and petroleum specialties, professional beauty, and specialty chemicals. Doing so has rewarded us with a true competitive advantage and global leadership. When you join Kline, you will be a part of delivering “team intelligence,” through your deep industry expertise, data management skills, and/or analytic capabilities.
